Full Body Strength Workout (3 Weeks)

Circuit training with machines holds value for lifters of all skill levels. When you're just starting out, these machines help to build the mind-muscle connection necessary to prosper with free weight variations. And since most of your early gains are neurological – not physiological – it's good to make. For beginners and those looking to start training again after a break, circuit training is especially effective. The use of machines allows you to work through a predetermined range of motion and the exercise order allows for optimum muscle recovery. The 15-rep range helps to build muscular endurance while allowing newer lifters to develop some muscle memory with these basic movement patterns.

SAS Program (Speed, Agility, Strength) Complete your Game!!!! \$60 for 3 (**3 Weeks Tues, (Dec 5th, 12th, 19th) Thurs**), **Dec 7th, 14th, 21st)** **Overview:** We all know that Speed and Strength training are extremely important in training for any sport. Many athletes are only focused on the sport skills and are lacking in this area. Speed/Agility and Strength Training will *complete your game*, allowing you to sharpen your skills, get stronger, and become more athletic. Ultimate Sports SAS program get the most out of its athletes. Speed, Agility, and Strength are just some of the components we focus on during this program. The results that our athletes have shown in the training facility can be seen immediately with their performance on the athletic field. It is very apparent that those athletes who spend time honing their skills at Ultimate Sports reap the benefits on the field.
